DETAILED ACTION

1. The amendment filed 10/29/07 has been entered. Claims 1-36 are pending in the application. Claims 11-30 and 34-36 have been withdrawn from consideration. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Objections

2. Claim 2 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 2 recites that the dispensing system includes an ink-jet printing dispensing system however Claim 1 has been amended to recite an ink-jet dispensing system.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-10 and 31-33 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 1 has been amended to recite that the nanofiller particulates are dispersed within the build material at from 0.1wt% to 20wt% of the build material, however,

based on the original disclosure at the time of filing and the Applicant's previous arguments, it appears as the weight percentage range is based on the total of the build material and the nanofiller particulate, i.e. the build composition, not the build material alone as instantly claimed. Further, Claim 10 has been amended to recite that the nanofiller particulates are "approximately" from 1 nm to 500 nm in size however the added limitation "approximately" appears to extend the particle size beyond the range originally disclosed at the time of filing.

Response to Arguments

5. Applicant's arguments filed 10/29/07 have been considered but are moot in view of the new ground(s) of rejection.
6. This application contains claims 11-30 and 34-36 drawn to an invention nonelected with traverse in the reply filed on 12/20/06. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.
7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,
